## **New Product Launches CIRSE 2022**

**The CIRSE Annual Meeting has become the number one platform for minimally invasive image-guided procedures worldwide. Every year, key players in the field choose CIRSE to launch their innovative new products.**

**To find out more about the products being officially launched during CIRSE 2022, please visit the company booths in the Exhibition Hall. You will find a detailed floor plan overleaf! A full list of exhibitors and a floor plan can be found in your pocket guide, as well as via the CIRSE app.**

Please note that the information has been provided by the corporate partners and does not reflect the opinion of CIRSE nor does it engage our responsibility.

I

AprioMed

AprioCore® plus

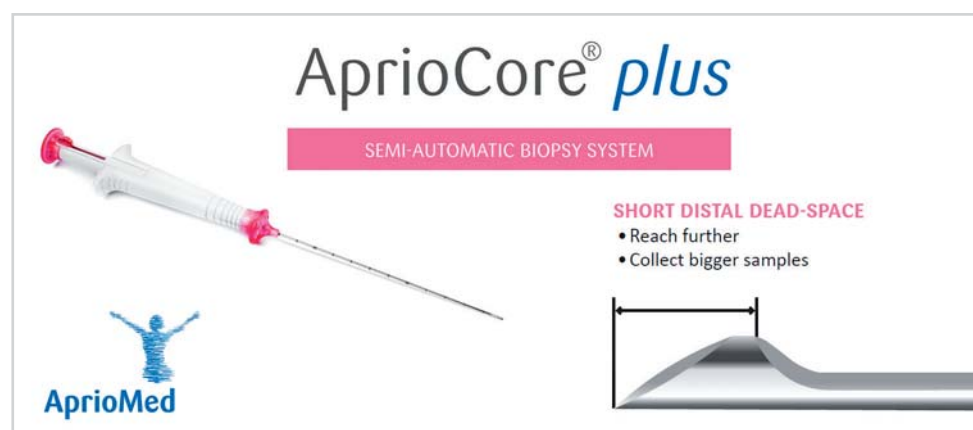

Semi-automatic biopsy needle

Reach further for bigger soft-tissue samples

AprioCore® plus is a sterile, disposable, semi-automatic, springloaded biopsy needle. AprioCore® plus is provided in a variety of sizes and can be used together with coaxial needles such as AprioMed's disposable Coaxial Needles Gangi-SoftGuard® and Gangi-HydroGuard®.

Features

- Short distal dead-space allows operator to reach further and collect a bigger sample
- Specimen release feature eliminates the risk of misfire during removal of specimen
- 10 and 20 mm notch allows full spring force also for 10 mm samples
- Cutting cannula with centimeter marking (marked in 1 cm increments) and echogenic distal tip to improve visibility during ultrasound guidance
- Length match Gangi-SoftGuard® coaxial needle

II

BD

Venclose™ RF Ablation Catheter

Simplified RF Ablation

The **only** dual heating length RF device that allows you to treat long and short refluxing vein segments with one catheter.

Features

**6F Low-Profile Design:** Small, 6F profile helps to minimize invasiveness and offers flexibility to navigate tortuous anatomy.

**Dual Heating Lengths:** Treat long and short refluxing vein segments with one catheter by switching between two heating lengths (2.5 cm and 10 cm).

**Marking and Curved-Tip:** Markings and curved tip help to ease navigation and positioning.

III

Cordis

RAIN Sheath™ Transradial Introducer: the next generation thin-walled sheath designed for consistent performance in radial cases

Cordis sheaths portfolio includes the ultra-low profile, thin-walled, RAIN Sheath™ Transradial Introducer, designed to reduce the risk of radial artery trauma and spasm, featuring:

Proprietary KINK RECOVERY TECHNOLOGY™

- Elastomeric properties allow the RAIN Sheath™ Introducer to bend and flex to maintain lumen integrity, reducing the need to exchange sheaths mid-procedure

In-vessel stability

- 1 cm non-slip secure zone at proximal end of sheath designed to secure placement after insertion
- Anchored placement helps prevent the sheath from "backing out" during procedures

Hexacuspoid hemostasis valve

- Designed to preserve hemostasis and reduce the risk of bleedback

Lubricious hydrophilic coating

- Facilitates smoother, easier insertion and removal

Available from 4F to 7F for expanded treatment applications

RAIN Sheath™ Introducer is part of a complete portfolio of advanced, integrated solutions for radial access.

Cordis

SABER™ .035 PTA Dilatation Catheter: Designed for Efficiency

SABER™ .035 PTA Dilatation Catheter builds on the successful SABER™ Catheter legacy, delivering excellent crossability<sup>1</sup> and trackability through tortuous anatomy and difficult lesions, longer lengths up to 300mm, and an excellent rewrap profile facilitating multiple reinsertions during the procedure, featuring:

Superior crossability<sup>1</sup>

- Low profile tapered tip with smooth wire-to-tip transition enhances crossability

Excellent deliverability

- Dual layer hydrophilic coating improves trackability & shaft design reduces risk of kinking and optimizes pushability

Extensive size matrix allows for expanded treatment applications

- Balloon diameters 3-12 mm and lengths up to 300 mm to treat long lesions with fewer inflations, potentially reducing procedural and fluoroscopy time

Effective dilatation

- RBP of up to 24 atm provides high rated burst pressure for effective dilatation of tough lesions.
