

CIRSE STUDENT PROGRAMME 2025

SEPTEMBER 13 - 17 | BARCELONA, SPAIN

The CIRSE Student Programme - Be inspIRed - enables undergraduate medical students to learn about interventional radiology and its applications through curated lectures, recommended hands-on device and simulation training sessions, and various social events specially designed for students.

Students are invited to attend CIRSE 2025 free of charge!

To further advance the development of interventional radiology and promote medical specialisation among future medical professionals, CIRSE has also ensured travel support grants for the first 200 students who successfully register for the congress.

To be eligible for the travel support, applicants must:

- be undergraduate medical students
- be aged 36 or younger
- reside and study within Europe

For more information about the Student Programme at CIRSE Annual Congress, please visit cirse.org/students
